**Weather Update Area:**
Central/southeast Missouri and southeast Illinois. Next update as warranted by changing conditions

**Warnings and Watches:**
Winter Weather Warning today 12:00 p.m. until midnight Saturday night

**Discussion (from NWS):**

**Hazard:** Winter Weather

A winter storm will impact the area this afternoon through early Sunday morning. Will mainly be heavy snow mixed with sleet at times. The current forecast calls for 8-9 inches of snow with the highest amounts centered from east central MO into southeast IL. Travel will be difficult, including the Friday evening rush hour.

**Timing:** The storm’s onset in the St. Louis metropolitan area is forecast for approximately 12:00 p.m. Friday (1/11) and ending early morning on Sunday (1/13).

**Accumulations:** Snow accumulations up to 8-9 inches with around 1/3 inch of sleet. Light glaze of ice accumulations also possible.

**WashU Impact:**

**Travel:** Evening commutes will be impacted. Rapid accumulation of snow will make travel extremely difficult. Extra time should be allowed for commutes. It is recommended that vehicles begin with a full tank of gas and be equipped with a flashlight and extra batteries, a first aid kit, a shovel, gloves, an extra pair of...
